

OptiStar® Elite

The next level
precision injection

With this evolution of **OptiStar® Elite**, our MRI injection system enables more precise protocols and is configured for the next generation GBCA from Guerbet*

OptiStar® Elite

Designed to work the way you work

OptiStar® Elite is a dual head contrast delivery system with an ultrasonic motor that makes it non magnetic and built for long lasting performance.

OptiStar® Elite was designed to address the needs of healthcare professionals for precision, efficiency, and ease of use in the magnetic resonance (MR) room.

OptiStar® Elite is further powered by Guerbet's solutions, providing healthcare professionals with the reliability they expect.

GUERBET'S SOLUTIONS

OptiStar® Elite

The right dose to the right patient at the right time

VOLUME PRECISION

down to 0.1mL

- Pediatric examinations
- Injections of lower doses of gadolinium, since already configured for the next generation GBCA from Guerbet.*

TIMING BOLUS®

- More precise timing of the injection, ensuring the contrast agent is delivered to the area of interest at the right time.

Prefilled syringe compatibility

- Allow for workflow efficiency during diagnostic procedures¹

Designed and certified consumables

- Our consumables are designed, tested and certified² by Guerbet to meet the highest Guerbet quality standards and to follow the Medical Devices standards and regulations.
- We leverage years of scientific research and innovation in diagnostic imaging to deliver Guerbet-designed consumables with evidence of excellence reported through traceability, certifications, and studies.³

Guerbet - Contrast&Care® Injection Data Management Solution 

OptiProtect™ 3S

Guerbet's original suite of Technical Services and Support brought to you by our readily accessible, factory trained, and certified experts that are committed to making continuity in your daily operations their priority.

Designed to protect the lifetime of your injection solutions, OptiProtect™ 3S can be tailored to address your challenges so that you can focus on enhancing patient care.

SUPPORT

Preventive Maintenance Agreement

- ✓ **Planned Annual Maintenance:** meet standard maintenance requirements
- ✓ **Controlled Costs:** labour and travel for Preventive Maintenance included
- ✓ **Risk Management:** 10% discount off the listed price of genuine spare parts, guaranteed 90 days when installed by a Guerbet Certified Engineer.

SECURE

Comprehensive Continuity Agreement

- ✓ Rely on the expert coverage level of the OptiProtect Shield full protection agreement
- ✓ Maintain your daily operations while we maintain your equipment
- ✓ **Optimized Uptime***: complete protection of your investment with a Guerbet Factory Certified Loaner unit**.

SHIELD

Full Protection Agreement

- ✓ **Planned Annual Maintenance:** meet standard maintenance requirements
- ✓ **Expert Support:** direct access to Guerbet's network of factory trained Engineers for both remote and on-site assistance, support, and guidance
- ✓ **Full Coverage:** unlimited on-site visits, including parts, labour, and travel.

Next generation GBCA from Guerbet being under evaluation by European Health Authorities (EMA) and for use only in countries with applicable health authority registrations. FDA approved.

GBCA = Gadolinium-Based Contrast Agents

** From an operational standpoint by providing data on the number of injections performed and the total injected volume that can help the users to make informed decisions related to their injector usage and contrast media ordering. From a clinical standpoint: Data on adverse events can help the users to identify patterns associated with the occurrence of adverse events (for instance high flow rate and extravasations) and make informed decision related to their injection practices.

OptiStar® Elite

The next level precision injection

OptiStar® Elite Contrast Delivery System is a medical device intended for use by qualified healthcare professionals.

It is intended to inject MR contrast media and flushing solutions into a patient's vascular system to obtain diagnostic images when used in conjunction with Magnetic Resonance (MR) Imaging equipment.

Class IIb/CE TÜV SÜD 0123 Manufacturer: Liebel-Flarsheim Company LLC EC Rep: Guerbet

Contrast&Care® is a medical device intended for use by healthcare professionals only. It allows imaging centers to collect, archive, view and share patients' injection data, including data concerning contrast products, adverse events, injector activity, data on the estimated eGFR and other pre-exam alerts, such as previously reported allergies. Contrast&Care® also provides options to review protocols, create protocol libraries, and visualize analytics data and trends relating to injection activity and contrast product usage.

Class I/CE Manufacturer: Medex.

For complete information about precautions and optimal usage conditions, we recommend consulting the instruction for use supplied with these devices or by your local Guerbet representative(s).
